

Assignment 10: Creating Dynamic Web Pages

Javier Sin Pelayo

URL (main branch): https://github.com/javisin22/csc372_projects

URL (client_site_v7): https://github.com/javisin22/csc372_projects/tree/client_site_v7

URL (live site): [here](#)

Part III: Hosting Your Site

For this assignment, as my original site is a Next.js + React.js app needing a Node.js runtime, I haven't been able to incorporate this in the original site itself. However, I have added a link in the main page where the PHP form page can be accessed.

- ClassConnect: <https://classconnect-18h8.onrender.com>
- Link to manually access the PHP page:
https://javiersinpelayo.rhody.dev/csc372_projects/client_site/index.php
